

Next steps for: VERIFIED SUSTAINABLE ETHANOL

The Verified Sustainable Ethanol Initiative is a first substantial step towards guaranteeing the European market "good ethanol". This is done in close collaboration with the Brazilian ethanol industry with the purpose to dramatically move the global market towards more sustainability. The first shipment of verified sustainable ethanol arrived in Sweden in August and the first round of auditing is being finalized in November. What are the initial experiences and the next steps?

Date	28th of November
Time	9.00 – 14.00
Location	Nalen in Stockholm, Stacken
	Entry from David Bagares gata
Registration	info@baff.info (before 21st of November)
